

240 Litre Wheelie Bin Range

READYFIX PRODUCT CODES: Z111-434 | Z111-435

A robust 240 litre two-wheel bin for general waste and refuse collection on construction sites, in welfare facilities, workplaces and commercial premises. The moulded polyethylene body and lid, reinforced rim and rubber-tyred wheels provide a practical mobile waste-storage solution.

- Comb-lift receiver for use with compatible approved collection equipment.
- Available in black and green for general or colour-coded waste collection.

Wheel axle	Tempered galvanised steel	Receiver	Comb lift
Transponder ready	Yes	Marking areas	Lid and body
Conformity	EN 840; RAL-GZ 951/1	Relevant directive	2000/14/EC

Use, care and safety

Position on a stable, level surface and keep the lid closed when not in use. Do not exceed the stated 96 kg holding capacity. Move the bin using the moulded handle and take suitable manual-handling precautions, particularly on slopes, steps or uneven ground. Only lift or empty with compatible approved comb-lift equipment. Do not use for hot ashes, burning material or liquids unless suitability has been confirmed.

Inspect the lid, wheels and axle regularly and remove the bin from service if damaged. Clean with warm water and mild detergent. Product image is illustrative and colour may vary. Dimensions include stated tolerances and maximums. Detailed manufacturer documentation is available on request; confirm critical requirements before ordering.
