

S3 SANITARY SILICONE

High Performance Sanitary Grade Silicone

Technical Data Sheet

PREMIERE SILICONE & SEALANT RANGE

CLASS
EN15651-1,3; F EXT-INT; S1

Description:

A premium grade, high modulus acetoxy sanitary silicone sealant. Low maintenance, fungal resistant and waterproof. Conforms to EN 15651-1,3: 2012.

Features & Benefits:

- ◆ **Sanitary grade - contains fungicide.**
- ◆ **Mould resistant.**
- ◆ **Waterproof.**
- ◆ **Permanently flexible.**
- ◆ **Ideal for humid conditions.**
- ◆ **For interior use.**

Uses

Bond It S3 SANITARY SILICONE is a one part silicone sealant with excellent adhesion to ceramics, glass, melamine laminates and sanitary plastics. It is also compatible with anodised aluminium, lacquered and primed metals, painted timber and plaster, sanitary plastics, primed or painted concrete. S3 contains a high performance biocide to prevent unsightly mould growth.

Ideal for sealing around worktops, basins, sinks, bed basins to vanity units and also to seal shower trays and shower units. It has been specially designed to seal in damp and humid areas.

Limitations

Do not use on bare metal or fresh concrete without priming. Natural stone, particularly marble must be protected by primer/ sealer. Not suitable for mirrors. For fixing mirrors use Bond It LN7, MIRROR-MATE or MIRROR-PRO Hybrid Adhesive. White and trans may yellow in colour over time if exposed to direct sunlight.

Preparation

Ensure all surfaces are clean, dry and free from grease or any contaminants that may hinder adhesion. Remove any old sealant.

Application

Apply using a standard sealant gun with the nozzle cut at an angle of 45°, and to an opening slightly larger than the joint to be sealed.

For bath surrounds: Half fill the bath with water to allow sealant to be applied at joint mid point. If necessary masking tape may be applied. If large gaps are to be filled, polythene foam, rod or tape should be used to provide support and minimise sealant wastage.

Tool down within 5 minutes using a wet spatula or SEALANT APPLICATOR TOOL. Any trims should be bedded into the silicone within 5 minutes.

For sealing waste outlets in sinks and baths: S3 should be applied so that it will be in compression after tightening of connecting pipes.

For metallised plastic trims: test for discolouration by sealant before use.

Tools can be cleaned in Bond It WHITE SPIRIT or MULTI-WIPES prior to curing taking place.

Coverage

Depending upon substrate condition and porosity approximately 10 linear metres with a 6mm bead per cartridge.

Colour

S3 SANITARY SILICONE comes in 3 colours: white, translucent and ivory.

Size

EU3 plastic cartridge.

Shelf Life

Minimum 24 months from date of manufacture when stored in original, unopened cartridges.

Storage Conditions

Store in cool, dry conditions at a temperature between +5°C and +25°C. Protect from frost and direct sunlight.

Disposal of Containers

Do not leave empty containers where residue could be harmful to children, animals or the environment. Remove any containers to a central disposal point in accordance with local regulations.

Recommended

Regular cleaning of the sealed joint is recommended in order to remove soap residue/organic matter that can cause mould build-up.

Health & Safety

Please refer to separate safety data sheet (SDS) for full handling, use and storage instructions. Keep out of reach of children. It is the user's responsibility to determine suitability for use. If in doubt, contact our Technical Department for advice.

Note: this information is for general guidance only, since site conditions and labour are beyond our control.

Specification Summary

Tooling Time	5-10 minutes
Skin Time	15 minutes
Full Cure Time	1-2mm depth per day
Application Temperature	+5°C to +30°C
Movement Capability	±20%
Density	0.95g/cm ³
Commodity Code	3214101000

Product / Order Details

Code	Colour	Fill	Barcode	UFI
