

# Araldite®

professional adhesives

## Araldite® Rapid 24ml Syringe

A strong, long lasting solvent-free adhesive which is water resistant and can be painted or sanded.

### Important

Bonds metal, wood, masonry, ceramics, glass, dry concrete, chipboard, leather, cardboard, fabric, rubber and most plastics (except polyethylene, polypropylene, Teflon®).

Make sure surfaces are clean and free from dust, corrosion, dirt and grease.

For optimum bonding, slightly roughen surfaces with sandpaper and degrease metals with a suitable solvent.

During assembly apply light pressure to the joint until set (clamps, tape) around 20 minutes.

Allow 3 hours to attain full strength before rough handling or sanding.

1 Snap off the resealable cap from between the syringe plungers and break off the end seal. Depress the plunger to dispense equal amounts of both components onto a clean disposable surface. Re-fit the cap to close the nozzle.

2 Mix thoroughly for at least 30 seconds until well mixed. Araldite® Rapid remains usable for max. 5 minutes.

3 Make sure both surfaces are clean and dry. Apply to both surfaces of the joint.

4 Assemble carefully and remove any excess adhesive with a sharp blade once partially set.

### How to apply

Araldite® Rapid is a strong 2-component epoxy with fast setting. Parts repositionable for 4 minutes. High temperature resistance (-30°C to 65°C). Oil, chemical and impact resistant.

Do not use to repair or bond items that will contact food or drink. Not recommended for bonding rear-view mirrors to car windscreens.

### Storage

Should be stored in a dry place at room temperature in the original syringe.

### New

Environmentally friendly product formulation plus eco-friendly packaging for easy recycling
